

## Team Meeting with TAs

**Attendance:** Victoria, Julianna, Angela, TAs

### Agenda

- Demo features completed:
  - Users authentication
  - Basic CRUD for companies/partners/reviews/discussions
  - AJAX functionality
- Discuss bugs
  - routing problems (partner\_paths)
  - others?
- Review schema decisions
  - Should Discussions have `_and_belong_to_many` user?
- Discuss Sunday TODOs:
  - Search-Sort-Filter (gem)
  - Categories & homepage
  - Rspec Testing (Rails?)
  - Beautification (bootstrap?)
- TA feedback on progress and complexity

### Minutes

- make sure we put out scaffolding, shouldn't see show edit delete. Only admin
- ajax lower priority.
- adding new partner on separate page (?)
- fix navigation, figure out UI better
- not seeing much beyond basic CRUD
- replies to discussions instead of just a thread
- ability to upload files
- by location / industry, just more information on reviewables
- creating a company/partner should be a bigger deal
- admin: verifying stuff, checking flagging stuff
- Google maps/crunch base for pre-population
- following companies/partners
- 'introductions', be able to contact users who have worked with a company/partner
- Discussions should contain multiple "messages"
- discussion has `_one` user (who is the poster of the comment)
- notifications (following a reviewable/discussion)
- think about the company (maybe)
- rspec: recommend rails instead
- Have fallback slide presentation for MVP demo
